| 授業内容<br>・<br>ねらい                       | <p>As in the first semester, the three speaking classes in this description will be taught by three different teachers using different materials. While the materials covered in each class will be different, the goals of all three classes will be the same. The goals are for students to speak up, practice their speaking, and improve their communication skills including presentation, pronunciation, providing information, asking for information, and negotiating meaning.</p> <p>While this class will include conversation practice, the goal is to go beyond what is normally taught in conversation classes to help students develop new abilities in speaking. The three teachers will work toward this goal using a variety of approaches including jigsaw lessons to solve problems, the structure of speeches, and visual aids.</p> |         |                     |
